HoverKart Diagram

1. Seat
2. Main Frame
3. Foot Support Bar
4. Handlebars
5. Adjustment Knob

Components

	1 Seat		1 Foot Support Bar		4 Nuts
	1 Main Frame		1 Allen Wrench		4 Black Cylinders
	2 Handlebars		4 Screws		2 Velcro Straps

How To Assemble Your HoverKart

Step 1: Using the Allen wrench, remove the screw, washer and 2 black cylinders from both ends of the pole on the main frame.

Step 2: Insert a black cylinder on each end of the hollow tube on the handle bar. Repeat this step for the other handlebar.

Step 3: Position main frame so that the extension is facing you and the 2 cross bars are on top. Attach a handlebar to left side of pole on main frame. Make sure handlebar is facing in same direction as main frame extension, and is pointing towards the ground. Using the washer and screw you removed in Step 2, secure handlebar to frame by attaching washer to handlebar with screw. Tighten screw using Allen wrench. Repeat Steps 2 and 3 with the other handlebar.

How To Assemble Your HoverKart, Cont'd.

Step 4: Align the four holes on the seat to the holes in the main frame. Insert a screw into each of the holes. Then, reach under the seat and fasten a nut to the bottom of each screw.

Step 5: Insert the foot support bar into the main frame and secure it by tightening the adjustment knob. Adjust the length to suit the rider's height.

Step 6: Insert one of the Velcro straps into the loop located in the back of the main frame (behind the seat). Fasten velcro. Repeat this step for the other back loop.

Step 7: Place the main frame/seat apparatus on the hoverboard. Brint the Velcro strap under the board and insert it into the front loop. Tug on the strap to make sure it's nice and tight. Fasten velcro. Do this for both of the front loops.

How to Ride Your HoverKart

Step 1: Assemble your HoverKart using the instructions provided in this manual.

Step 2: Make sure your hoverboard is set to **OFF**. Sit down on the HoverKart seat and raise the handlebars up to a 45-degree angle until the hoverboard is level with the ground.

Step 3: Place your feet on the foot support bar of the HoverKart.

Step 4: While the hoverboard is level, carefully turn **ON** the hoverboard.

Step 5: Slightly push the handlebars down and forward to move forward. To slow down and stop, slightly pull the handlebars up and back.

Warranty

The HoverKart Warranty is limited and is valid for 90 days. The warranty covers qualifying manufacturer's defects.

In order to qualify for the warranty, you will need to provide proof of purchase along with purchase date.
